Dear ~~Mr. Dray,~~ Toby

We would like to thank your team for the effort and accomplishments that were displayed to us on the 04/09/15, showcasing our Bookhunter application after the first sprint. As your clients, we are unanimously pleased with your team's development efforts and we look forward to subsequent value delivery. After our meeting last friday, we would like to raise a few points that our team has noted:

There was a total of 21 Story Points and an estimated 84 hours of work to be completed during Sprint 1. We were expecting an attempt to complete the following user stories:

User Story	Completed Yes/No?	Notes/Status
[SEVZER-1] log in	No	Functional - however it needs a 'forgotten password' link found in SEVZER-2
[SEVZER-2] sign up	No	Functional - but user data being captured doesn't match acceptance criteria. The button is at the bottom of the page and needs a more prominent position.
[SEVZER-4] Textbook upload/listing	No	Functional - the 'Condition' and 'Swap/Sale/Borrow' fields need to be changed to drop down boxes
[SEVZER-13] Logout	No	Functional - I could still access textbooklistpage.php but not uploadbookpage.php. A sign out link is present while not signed it. Your SEVZER-1 card could be combined with this one to provide a dynamic sign in/out button.
[SEVZER-16] Remove Textbooks	No	Functional - but doesn't match acceptance criteria. I accessed this page through 'My Uploads' instead of 'Profile' (to be delivered in the next sprint)
[SEVZER-23] Main Page	No	Functional - the nav bar and textbook 'swiper' aren't complete yet
[SEVZER-24] Universal access	Yes	Story Card Resolution: 'Done'

[SEVZER-25] Filter by: Textbooks for borrow	No	Functional - need a default picture for uploaded textbooks and there's no way to filter by 'borrow' or 'sale'
[SEVZER-26] Filter by: Books for sale	No	See above
[SEVZER-29] Textbook details amendments	No	Not present within the application
[SEVZER-33] View My Uploads/Listings	Yes	Story Card Resolution: 'Unresolved'
[SEVZER-36] Hide textbook	No	I can still see textbooks on textbooklistpage.php while their State is 'Hidden'

I am happy with the value your team has delivered in Sprint 1, most of your user stories are functional and just need a minimal amount of work to be completed. I will be editing the acceptance criteria of your team's user stories in Jira by the 10/09/15 to reflect our expectations.

Although the demonstration of your product features was delivered well, there are several improvements that you may consider for the next product demonstration. Technical problems may occur due to different compatibility settings between the device that the system was being tested on and the one used for demonstration. Cloning your git repository to your server and running your application on several different devices with different operating system is advised to ensure all the features function as expected. We realized that there were several buttons for linking one page to another page unexpectedly not working, e.g. 'edit profile' page. We would like to suggest a notification functionality to be given every time a new user has successfully registered. Textbook owners should be able to edit their textbook details in their profile. We note that you have recognized this, but there are currently two 'sign in' buttons found on your homepage.

The product's first demonstration has answered our need to know what a textbook swapping-and-selling platform would look like. We understand the features that the product offers, as if we are the actual users navigating the application. We believe that your website is user friendly for everyone from all age groups and backgrounds to use. Your team was confident when demonstrating the product and the functionalities of related user stories from the sprint plan. We noted that you had to adjust a few lines of code before the demonstration began, but you were able to resolve all issues promptly. We believe that's testament to the effectiveness of your team. Your team members had strong reasons to defend why those features are not working as expected and are open for any advices given. As well as that, your team members managed to confidently answer the questions being assessed regarding your project. We hope you find our review constructive and take action on the points we have raised. We look forward to the first release of our product and wish your team the best of luck during this next sprint.

Kind regards,

Farahiya Musthofa and Nathan Norris
